

What is Custom Piano Restoration?

- What AMG does for Mercedes
- What Frank Gehry does for buildings
- A level of artisanal responsibility, excellence and ownership rare in our culture.
- Achieving a higher order of tonal and kinesthetic harmony in the piano than is normally available in hand-built factory instruments.
- Our highest priority is to bring each instrument to its fullest practical expression of music and beauty. We are all musicians and music lovers.

Again, and finally, welcome to our world; we hope you enjoy this oasis of music & art as much as we do. You're on our VIP list, and we hope you'll be with us for performance after performance over the years; we pledge to bring you the finest players we can convince to come and join us.

We invite you to spend a few minutes after the concert tonight looking more closely at the pianos and introducing yourself to the rarified and arcane world of custom piano restoration.
